 **por Fit Learning Systems S.L.**

What is ADI NEX?

ADI NEX is a generative intelligence system developed by **FIT Learning** that answers questions in real-time about training content, optimizing corporate learning and technical support

Generative AI

AI-powered training and technical support.

Real-Time Multilingual Responses

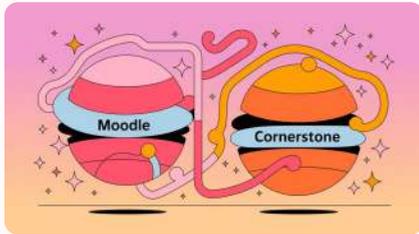

Immediate access to key training information.

Full Accessibility

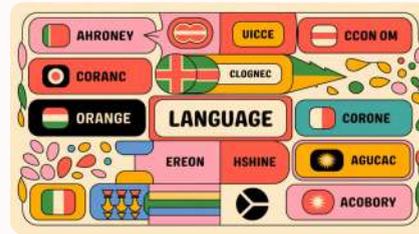

Available 24/7 from any device.

Key Features of ADI NEX

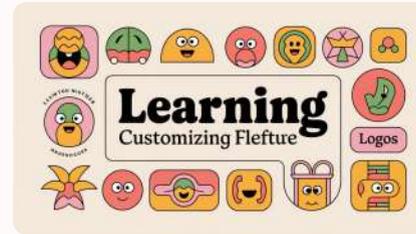

LMS Integration

Easy connection with Moodle, Cornerstone, and more platforms.

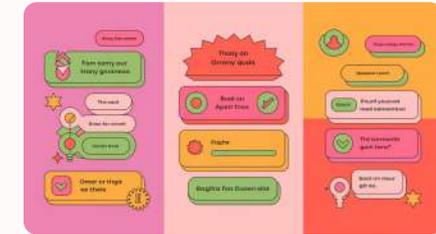

Multilingual Support

Accessible training in multiple languages for global reach.

Advanced Customization

Full adaptation to your company's visual identity.

Simplified Management

Efficiently manage your training content.

Key Features

Personalized Web Portal

Efficient hosting of training content.

Integrable Button

Easy access from existing courses.

Intelligent Analysis

Machine learning of training material.

Contextualized Responses

Direct links for superior precision.

Applications

ADI NEX adapts to multiple business scenarios, offering comprehensive solutions from training to regulatory management.

Continuous Training

Empower the professional development of your teams with personalized and adaptive learning. Ensure excellence through continuous reinforcement, instant resolution of doubts, and progress monitoring. Perfect for upskilling programs, certifications, and internal talent development.

Technical Support

Revolutionize your technical support with intelligent assistance available 24/7. Minimize response times, eliminate bottlenecks, and empower your teams with immediate and precise solutions. Optimize resources with updated technical documentation and advanced resolution protocols.

Internal Documentation

Transform corporate knowledge management with a centralized intelligent hub. Accelerate decision-making with instant access to updated manuals, policies, and procedures. Enhance collaboration and efficiency with intelligent and contextualized searches.

Standards and Procedures

Maximize regulatory compliance with intelligent access to corporate protocols. Ensure effective implementation of standards with automatic verification of understanding and real-time updates. Reduce operational risks with precise monitoring of regulatory compliance.

Benefits

Lead the Transformation

Continuous digital innovation

Empower Support

Advanced technical assistance

Enhance Learning

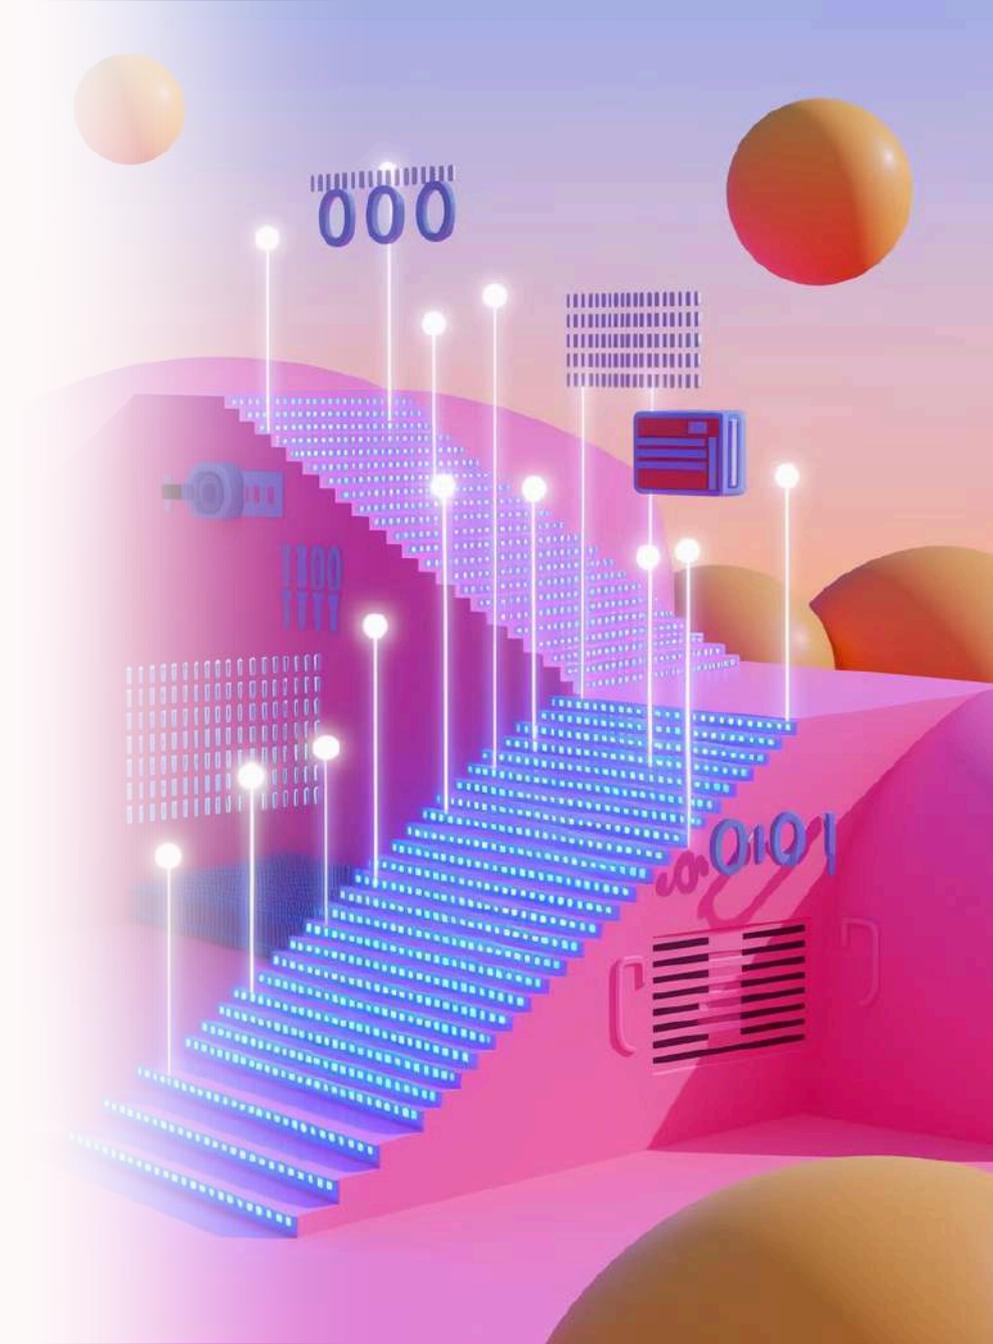

Superior learning experience

Optimize Knowledge

Efficient information management

Our solution offers a comprehensive progression from basic knowledge management to the complete digital transformation of your organization. Each level builds upon the previous one, creating a complete ecosystem of business learning and support.
