MOODLES

SMART MOBILE

Moodle is an **online learning** platform , also known as **LMS** *(Learning Management System),* which allows educators to create online courses.

and manage their students' online learning.

Moodle is **open source software,** which means that anyone can freely download, modify and distribute it. It is designed to be highly **customizable** and can be adapted to the specific needs of each educational institution.

Courses in Moodle can include various tools such as

discussion forums, questionnaires, homework, online lessons, multimedia resources, among others. Mood also has tools

student **progress tracking** and communication tools, such as internal email and chat.

Moodle is used in a variety of educational settings, from schools and universities to businesses and non-profit organizations that offer online training.

SmartMobile is an innovated
The first training and communication platform developed by FIT Learning that offers an excellent learning experience to its students and **makes it easier for administrators to manage** and organize training activities, allowing a **reduction of up to 80% of the time** spent to those tasks.

The use of innovative technology and **artificial intelligence** allow us to offer a tailored solution

for each organization, easily

you customizable and scalable. With more than 200,000 users and close to 4,000,000 million **videos** viewed, it is currently **one of the most most attractive market**

as evidenced by the **award for the best technological solution for training obtained in 2022.**
