At FIT Learning we create the best training experiences to facilitate learning in the simplest, most fun and effective way.

METHODOLOGY

We have designed a methodology that allows us to guarantee the best results.

Our methodology is based on **3 stages**:

MICROLEARNING

1. **LEARN**

GAMIFICATION

2. **CONSOLIDATE**

IN-PERSON/WEBINAR

3. **PRACTICE**

1. **Microlearning. LEARN** at your own pace through our microlearning content and different video solutions, ebooks and scorm courses from our **SmartMobile platform**.

Training has never been as easy as it is now.

2. **Gamification. CONSOLIDATE** learning with our **SmartGame module**. Challenge other participants, testing your knowledge, unlock avatars and get medals.

Training has never been so much fun.

3. **Face-to-face/webinar. PRACTICE** through training, either face-to-face or by webinar with an expert in the field. With the SmartLive module , reduce the cost and time of face-to-face sessions **by up to 70%** .

WHAT DO YOU NEED? TELL US YOUR IDEA!

We develop your course in 2 steps, creating a complete training experience.

1. We give shape to your idea, **we design a script** that allows us to develop your course
2. **We create your course combining up to 16 different resources**, because a course is more than just a collection of videos or screens

WE USE ARTIFICIAL INTELLIGENCE TO CREATE HIGH QUALITYCONTENT

We use AI tools to create more sustainable projects, which allow us to develop solutions tailored for each client.

The use of AI allows us to:

1. Reduce delivery times by up to 70%
2. Have courses in more than 100 languages and accents easily and quickly
3. Greatly facilitate changes and new versions of the content of each course
4. Access unlimited virtual resources to design each training session

The key is knowing how to use the resources
suitable to create the best training experiences for each person
